Quiz #1

In problems 1–3, match each set operation with its corresponding definition.

- | | |
|---------------|--|
| 1. $A \cup B$ | A. $\{c c \in A \text{ and } c \in B\}$ |
| 2. $A \cap B$ | B. $\{c c \in A \text{ or } c \in B\}$ |
| 3. $A - B$ | C. $\{c c \in A \text{ and } c \notin B\}$ |

1 _____

2 _____

3 _____

4. Check the corresponding boxes to indicate that a number is a member of a particular set.

| | -5 | $\sqrt{13}$ | 0 | $\frac{10}{5}$ | 0.384 | $10.056\overline{123}$ | π |
|------------|------|-------------|-----|----------------|---------|------------------------|-------|
| N | | | | | | | |
| W | | | | | | | |
| Z | | | | | | | |
| Q | | | | | | | |
| R-Q | | | | | | | |
| R | | | | | | | |

5. True or false: Between any two rational numbers there is an infinite number of irrational numbers and between any two irrational numbers there is a finite number of rational numbers.

6. Fill in the blanks.

Semantically, we think of $|a|$ as the _____ from a to _____.

7. Evaluate: $\frac{|5-9|}{2} =$

For problems 8–10 let:

$A = \{\text{real numbers between } -2 \text{ and } 2, \text{ inclusive}\}$

$B = \{\text{positive real numbers}\}$

8. Express A and B in set-builder notation.

$A =$

$B =$

9. Express A and B in interval notation.

$A =$

$B =$

10. Express the following operations in interval notation.

$A \cup B =$

$A \cap B =$

$A - B =$
